

**PRESCRIBED BURN COST-SHARE PROGRAM**

Thank you for your interest in the Village’s Prescribed Burn Cost-Share Program. The program requirements are authorized by "An Ordinance Providing for Ecological Cost-Share Programs in the Village of Riverwoods" and are subject to such ordinance, as from time to time amended. Note: an Ecological Consultation and approval from the Village Ecologist is required prior to applying for the Prescribed Burn Program. **Please read all requirements carefully and complete the checklist before submitting your completed application.** The Prescribed Burn Program is a 1-year 50/50 cost share program. The Village’s share limit is \$2,000. The applicant is not eligible to re-apply for 3 years. There is a \$150 non- refundable application fee. Note: prescribed burning requires trained workers. Therefore, the Village will not reimburse an applicant who performs the work themselves rather than hiring a qualified contractor.

The intent of the Prescribed Burn Program is to provide an incentive for residents with relatively healthy woodlands and/or prairies to maintain the health of these areas using fire which was very common prior to European settlement in the 1830s. Prescribed burn management is safe when conducted by trained professionals and helps improve the health of woodlands or prairies by removing thatch, replenishing soil nutrients, and allows desirable native plants to thrive.

To be eligible to participate in the program, the applicant must certify that they will comply with all requirements set forth in the packet. The property owner is responsible for obtaining all burn permits, property locations and staking their property lines prior to burning and notifying adjacent residents, etc.

After the Prescribed Burn Permit Application is approved by the Village Ecologist, the applicant will receive a permit from the Village to proceed with the work. Once the work is completed, notify the Village within one month and the Village Ecologist will conduct a site visit to verify the burn has been completed and Performance Standard met. The reimbursement request is then forwarded to the Village Board for approval. Reimbursement can be expected in 1 to 3 months following the approval of work.

**Checklist for Prescribed Burn Program:**

1. Conduct the required Ecological Consultation (to generally locate proposed burn area) with the Village Ecologist.
2. Receive map and specifications (completed by Village Ecologist) including Prescribed Burn Program information packet and Application from the Village. The Application form is attached but can also be obtained from Village Hall or by downloading from the Village Website.
3. Receive permit from Village then hire a qualified contractor to perform the prescribed burn per the provided map, Specifications, and Standards.
4. Submit a copy of the paid contractor invoice to the Village Hall and request a final inspection by the Village Ecologist within one month of conducting the burn. The Village Ecologist will inspect the site to determine if the burn meets Performance Standards, review the contractor invoice, and contact the applicant, if necessary, for clarification and approve the payment of reimbursement from the Village. The Village Board will then approve the reimbursement payment to the applicant within 1 to 3 months of work.
